PROFESSIONAL SUMMARY

Full-Stack Web Developer and final-year Software Engineering student at Ajloun National University, with 3+ years of freelance experience (since 2022) delivering 40+ web and mobile projects for clients across the MENA region. Skilled in building scalable applications end-to-end with React, Next.js, TypeScript, Node.js, Express, Prisma, PostgreSQL, and MongoDB, deployed on Vercel, Render, and Neon.tech. Experienced in RTL/Arabic UI design, API integration, load testing, and cross-platform mobile development with Flutter. Also brings 2+ years of specialized background in FiveM game-server development (Lua), building custom gameplay frameworks used by thousands of players. Founder and maintainer of ieeeanu.app, the official platform for the IEEE ANU Student Branch.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#, Dart, Lua, HTML5, CSS3, SQL

Frontend: React, Next.js, Flutter, Tailwind CSS, Responsive & RTL/Arabic UI Design

Backend: Node.js, Express.js (v5), REST API Design, Authentication & Password-Reset Flows

Databases & ORM: PostgreSQL, MongoDB (Atlas), Prisma ORM, SQLite

DevOps & Deployment: Vercel, Render, Neon.tech, Docker, Git, GitHub, DNS Configuration (Namecheap, Name.com)

Testing & Performance: k6 Load Testing, API Rate-Limiting & Bottleneck Diagnosis, CORS Debugging

AI & Data: Together AI API Integration, scikit-learn, TF-IDF, Logistic Regression, Pandas

Tools & Platforms: Resend (Transactional Email), Postman, VS Code, Visual Studio

Security: Kali Linux, Wireshark, Network Security Fundamentals (TryHackMe, HackTheBox)

Game Development: FiveM Server Scripting, OxLib, QBCore, MySQL

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Independent (MENA Region)

2022 — Present

- Delivered 40+ end-to-end projects for clients across the MENA region, spanning SaaS dashboards, e-commerce platforms, custom REST APIs, and tourism/event-management systems.
- Built full-stack applications using React, Next.js, TypeScript, Node.js, Express, and Prisma with PostgreSQL/MongoDB, deployed on Vercel and Render.
- Designed and implemented RTL Arabic interfaces and complete design systems for multiple Arabic-language platforms.
- Maintained a consistent 5-star client satisfaction rating through clear communication and reliable delivery.

Founder & Platform Maintainer | IEEE ANU Student Branch — ieeeanu.app

2023 — Present

- Designed, built, and continue to maintain ieeeanu.app, the official web platform for the IEEE ANU Student Branch, including an e-commerce store, workshop registration, and membership services.
- Resolved production CORS issues between the Vercel-hosted frontend and Render-hosted backend by reconfiguring environment variables.
- Conducted k6 load testing and identified the API rate limiter as the system bottleneck at 50 concurrent users, then optimized it to improve throughput.
- Integrated Resend for transactional and bulk email (including custom domain DNS verification) and built a secure password-reset flow.
- Integrated Together AI's API to add AI-powered features to the platform.
- Designed professional branded HTML email templates for member communication.

FiveM Developer & Server Manager | Various Roleplay (RP) Communities

2021 — 2023

- Developed bespoke gameplay systems for multiple Arabic FiveM roleplay servers, including custom economy frameworks, housing systems, job systems, and anti-cheat solutions.
- Built and launched Justice City Framework (JusticeCFW), a full FiveM server framework featuring player statistics, content-creator showcases, live-streaming integration, and a job system with custom UI and progression mechanics, using Lua, JavaScript, and React.
- Optimized server-side scripts for low-resource consumption, supporting stable gameplay for a player base of thousands.

KEY PROJECTS

Nashmi (نشمي) — Jordanian Tourism App

2025

Multi-platform Jordanian tourism application, built across three iterations.

- Developed a Flutter mobile app backed by a real Node.js/Express/MongoDB API, handling app compilation, database setup, and API integration.
- Built a full-stack Next.js web platform with a complete Prisma schema and a full RTL Arabic design system.
- Planned and configured production deployment on Render.

Tech Stack: *Flutter, Dart, Next.js, Prisma, Node.js, Express, MongoDB, RTL Arabic UI*

Legal-AI Workshop Registration Platform

2025

- Built a full-stack registration system for a legal-AI workshop using Node.js, Express 5, and MongoDB Atlas.
- Authored professional Arabic RTL documentation and a full README with custom branded assets and screenshots.
- Produced an HTML-to-image promotional flyer, resolving Arabic font-rendering compatibility issues with wkhtmltoimage.

Tech Stack: *Node.js, Express 5, MongoDB Atlas, HTML-to-Image, Arabic RTL*

NovaX Event Management System

2024

- Built a full event-management web application for the NovaX Engineering Competition at Al-Yarmouk University under a strict competition deadline.
- Implemented the data layer with Prisma and SQLite, followed by a full codebase debugging and quality audit.

Tech Stack: *Next.js, Prisma, SQLite*

نبيض (Nabd) — Arabic Social Platform Prototype

2024

- Designed and built a full-featured Arabic social platform prototype supporting multi-user interaction, real-time notifications, bookmarks, user settings, and user-blocking features.

Tech Stack: *React, Node.js, MongoDB*

Justice City Framework (JusticeCFW)

2021 — 2023

- Full-featured FiveM server framework with player statistics, content-creator showcases, live-stream integration, and a custom job/progression system.

Tech Stack: *Lua, JavaScript, React, CSS, MySQL, OxLib, QBCore*

Arabic Text Classification System

2023

- Built a text classification pipeline in Python using TF-IDF and Logistic Regression to sort Arabic text into four categories, for integration into ieeeanu.app via Flask.

Tech Stack: *Python, scikit-learn, TF-IDF, Flask*

TRY JO E-commerce Store • ATP Security Dashboard • User Management Dashboard

2022 — 2023

- TRY JO: comprehensive Arabic e-commerce platform with product browsing, category filtering, and a full shopping-cart system.
- ATP Security Dashboard: real-time monitoring dashboard tracking CPU, RAM, storage, network traffic, and security logs with an Arabic RTL interface.
- User Management Dashboard: full user-account, role, and permission management system with statistics, search, filtering, and export.

Tech Stack: *HTML, CSS, JavaScript, Arabic RTL*

EDUCATION

B.Sc. in Software Engineering | Ajloun National University (ANU), Jordan

Expected 2026

- Final-year student; relevant coursework: Algorithms & Data Structures, Object-Oriented Programming, Internet Applications Programming (PHP), Visual Programming (C#).
- Active member, IEEE ANU Student Branch — designed and maintain the branch's official web platform.

CONTINUOUS LEARNING

- Algorithms & Data Structures — asymptotic analysis (Big-O/ Ω / Θ), sorting algorithms, Master Theorem, and algorithm-design techniques.
- Cybersecurity Fundamentals — Kali Linux, Wireshark, and network-security practice on legal platforms (TryHackMe, HackTheBox).
- Data Analytics — Pandas, SQL joins, ETL processes, and Tableau for data visualization.
- C# Programming — object-oriented design, collections, and Windows application development.

LANGUAGES

Arabic: Native **English:** Professional Working Proficiency
